

EMERGE - Asset Location Solution

A secure, Smart App-to-Cloud based system that locates, manages and dispatches equipment where it needs to be, with equipment status, maintenance records and aggregate views by geography, equipment type, etc.

Core Features:

- Out of the box Auto-ID capability just by scanning the manufacturer's UPC or UDI barcode
- Auto-ID of the transaction location by address, zip code, and Latitude/Longitude coordinates
- Cloud-based console for geo-mapping views by zip or GPS coordinates
- Compatible with existing devices

For government agencies at the state, county and local level there is now an equipment and supply solution that connects all of your assets in one place – with the ability to see them all in the grouping of your choice.

As a cloud-based solution, EMERGE works right out of the box with your existing devices and supplies, or with new ones that can be pre-loaded before delivery to minimize the need for IT support on site and ensure you hit the ground running.

For Any Equipment or Supplies:

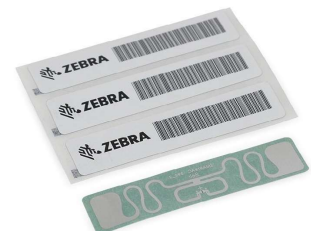

TC57 Mobile Computer

RFD8500 RFID Sled

ZT410 RFID Printer

RFID Labels & Tags

ViziTrace EMERGE Applications:

- **Disaster Response Agencies** - Create transparency on location and status of equipment or supplies across all locations.
- **Health Authorities** – State, County or City level healthcare agencies can leverage EMERGE for planning and management to quickly identify location of key supplies.
- **National Guard** – can deploy EMERGE to track, locate and share equipment and supplies where needed most when responding to disasters in their state.

A Solution That Logs, Tracks, Locates, Dispatches and More.

ViziTrace EMERGE adapts to work out of the box with your existing devices – or deployed with your new ones using bar codes, RFID or both.

Scalable & Customizable to Any Response Need or Environment

Knowing what you have available, its location and viability are critical factors in bringing the right level of response. ViziTrace EMERGE brings digital predictability and precision to every application.
