# ViziTrace

# RFID Software & Visibility Platform

## The Challenge

You recognize the tremendous potential of RFID. But like many others, you openly wonder about the challenges in deploying it:

- Custom user interfaces, data filters and device configurations.
- Software incompatibilities making it difficult to import and integrate raw data into back-end systems.
- Handheld applications that need to be developed from scratch.
- The complications and expensive delays that make for a steep learning curve

Implementation of RFID technology has shown that it can improve supply chain accuracy **up to 90%** and inventory count accuracy **up to 95%**

## The Solution

Introducing ViziTrace RFID Solution. Vizitrace gets you on the fast track to deploying RFID and simplifies deployment:

- Pre-built interfaces, handheld apps, and other solution components are ready to go right out of the box.
- Modular, highly adaptable software designed for multiple industries, business applications, and devices.
- Dependable performance that removes complexity and captures higher returns at a faster rate and lower risk.

## Modularity That Fits Your Business Needs

ViziTrace's modular structure means you purchase only the components you need when you need them. As both your business RFID use grows, components can be added to create a business driven solution model.

## The Most Cost Effective

From day one, ViziTrace will have data storage structures, pre-developed interfaces, handheld applications, canned business reports and a report writer – all easily customizable. Remote monitoring and debugging simplify management too.

## A Faster Return on RFID

ViziTrace's simplicity allows you to accelerate your deployment timelines, and your return on your RFID investment. ViziTrace IS a shortcut to developing, integrating, using, and managing RFID.

## Seamless Growth

No starting over required. ViziTrace seamlessly scales from one location to thousands, and builds on your previous investments. As your needs change, expand your business instead of your budget.

# Who Can Benefit from ViziTrace?

## Supply Chain

All the links in your supply chain benefit from RFID and ViziTrace. Expedited receiving and processing, faster cycle counts, improved accuracy, all result in decreasing returns, increased turns and higher customer satisfaction. With improved traceability comes improved control to facilitate compliance and validate all shipments.

## Health Care

With ViziTrace and RFID, spend less time on inventory management and more on patient care. Traceability also inoculates organizations from theft and counterfeit supplies. Should an emergency strike, RFID and ViziTrace can assist in quickly and accurately tracking triage patients, enabling you to provide them with optimal care.

## State & Local Government

From evidence to documents, from weapons to vehicles, IT assets and even people — students, citizens and prisoners, ViziTrace and RFID make it easy to keep track of it all and make asset visibility fast, easy and precise. The budget impacts go well beyond the short-term reduction in lost items and extend to the man-hours involved, legal impacts, etc.
